Coronary Stent System
PASSION IN HEART

01

Cobalt chromium alloy material provides persistent support force and better fatigue resistance.

02

The extremely low profile makes it easier to cross the stenosis lesions and ensures excellent crossability.

03

Mesh structure and low shrinkage rate of stents ensure accurate release.

Stent

Delivery System

04

The advanced laser bonding technology ensures the balloon has a minimum profile and a better crossing ability.

05

Tip laser forming technique enhances a good performance of crossing the stenosis lesions.
